

VARUN K

B.Tech Information Technology Student | Full Stack Developer

skvvarun6@gmail.com • github.com/varunk6 • linkedin.com/in/varun-k-20061307v • varunkportfolio.vercel.app

PROFESSIONAL SUMMARY

B.Tech Information Technology student with a strong foundation in Full Stack Web Development, Mobile Applications, and AI/ML solutions. Experienced in developing responsive web systems using React, Node.js, and MySQL, as well as desktop business POS software and Android applications. Dedicated to building practical, reliable, and user-centric software applications.

EDUCATION

Dr. Mahalingam College of Engineering and Technology

Bachelor of Technology (B.Tech) in Information Technology

Sri Krishna Matric Higher Secondary School

Higher Secondary Certificate (HSC) / Secondary Education

Pollachi, Tamil Nadu

Pursuing

TECHNICAL SKILLS

Programming:	Python, Java, C, JavaScript, SQL
Frontend:	HTML, CSS, React, Tailwind CSS, Vite
Backend & Database:	Node.js, Express.js, REST APIs, MySQL, MongoDB
Mobile Development:	Android (Java/Kotlin), Flutter / Dart
AI / Machine Learning:	Machine Learning, Computer Vision, Scikit-learn, Streamlit
Tools & Platforms:	Git, GitHub, VS Code, Android Studio, Firebase, Electron

SELECTED PROJECTS

AVR Stationery POS | Billing & Inventory Management System

React, Node.js, Express, MySQL, Electron

- Built a desktop POS system for stationery stores with real-time billing, cart management, and inventory stock tracking.
- Implemented automated GST calculations, barcode scanner integration, invoice generation, thermal printing, and returns management.

ShareBite | Surplus Food Sharing Platform

React, Node.js, REST API, MySQL

- Developed a web platform connecting surplus food donors with local communities to reduce food waste.
- Designed user-friendly food listing workflows, donor registration, food availability tracking, and request management.

Accident Detection System | AI/ML Road Safety System

Python, Machine Learning, Computer Vision

- Engineered an automated accident detection application using computer vision algorithms to identify traffic incidents.
- Automated visual signal processing to facilitate rapid emergency notification and improve road safety response times.

Smart Crop Recommendation System | Agricultural Predictor

Python, Machine Learning, Streamlit

- Built an ML classification model recommending suitable crops based on soil nutrient composition (NPK) and climate data.
- Deployed an intuitive Streamlit interface allowing farmers to easily input parameters and receive immediate recommendations.

LifeMate | Personal Management Android App

Android (Java/Kotlin), Firebase

- Developed a unified Android productivity app consolidating daily tasks, finances, recurring bills, notes, and document storage.
- Integrated Firebase cloud database sync, expense tracking visuals, vehicle management logs, and task notifications.
